Presentation

Frances Trahan, staff mount maker for the MFAH, returned again to demonstrate ways to create mounts for glass artworks using techniques, materials and tools readily accessible to everyone. This was a continuation of the presentation she gave to GG in January of 2023, and focused on creating a stand for a typical fused glass bowl. She explained her design process to create two different types of displays for the project; one using acrylic rods and another using museum putty. Frances is trained and highly talented in using all sorts of materials, and her problem-solving skills are impressive. We are again grateful for her time and insights.
